

Brian Rodine

I'm raising my hand to continue to serve on the council to protect and improve our community and the things that make Minturn, Minturn.

While important decisions loom on water infrastructure, development and land use, and growth management, if you keep the community's interests and these defining characteristics of Minturn in mind, we can keep the unique things about our town intact while investing in our future, serving residents, and welcoming change.

Since March 2023, I've been on the current council. I've asked hard questions of developers, worked toward better partnerships with our large landowner/land management neighbors, and have dedicated many hours of time reading council agendas and memos on a wide variety of topics. I'd be honored to be chosen to continue this service to the community as a council member for the next term, and I promise to continue to dedicate the needed time and work toward caring for this special place we call home.
